How to setup extender via management page

Product line: Wireless Model number: A9

We can use A9 to extend our wireless network via button or management page.

This article will guide you set extender via management page. Before setting A9, please make sure that you can access to Internet. And check wheather your computer is connect to the main router directly. Steps are as follow:

Part 1: Login to the management page

Part 2: Configure the extension

Part 3: Adjust the placement of A9

Part 1 Login to the management page

- 1. Get the default WiFi name from the A9's fuselage stickers, and then use a laptop or mobile phone connected to the WiFi signal..
- 2. Open a browser and type re.tenda.cn or 192.168.0.254 in the Address bar, click Enter, then you can access to the homepage

Part 3 Adjust the placement of the A9

1. The signal strength icon between the router and the extender represents the strength of the mainrouter signal received by the extender. We recommend that the extender be placed at a signal strength of about 50%.
